### DYE SUBLIMATION

- into the future and beyond -

Dye sublimation is a unique process of dyeing any image into the fabric. The process involves digitally printing any design onto special papers and then heat pressing the papers at 200 degrees to infuse the ink into the fabric.

At SCODY we have the latest technology to sublimate any design into fabric - coolmesh, lycra or thermal dolimiti. With this unique process the colours remain vibrant and clear for the lifetime of the fabric and the breathability, stretch or density of the finished garment is not altered.

Whether you want a picture of the Sistine Chapel or a classic simple design, the results are always sharp and stunning.

With digital printing and dye sublimation you are only limited by your imagination!

# symbols

**Coolmesh:** Specially knitted with a micromesh filament polyester. This assists in expelling heat and sweat away from the body to help keep the athlete cool and dry. **COOL!**

**Dupont Lycra:** has lasting shape retention, comfortable fit **FREEDOM OF MOVEMENT!**

**Bar Tack:** A sewing technique that promotes the durability of the stitching **LONG LIFE!**

**Sublimation:** A unique process that involves dyeing the image into the fabric **THE FUTURE!**

**Hidden Zip:** The zip is hidden and therefore allows logos to be seen clearly across the zip line **MAXIMUM EXPOSURE!**

**Raglan Sleeve:** The sleeve join meets at the neck allowing logos to be placed on the shoulder. **PROMOTION!**

**Silicon Gripper:** This prevents the fabric riding up your arms & legs. **PERFORMANCE!**

**Multi Level Chamois:** This is a seamless chamois made from Italian quality high density foam with pressure point relief zones and antibacterial properties **COMFORT!**

**Multi Level Chamois:** This is a seamless chamois made from Italian quality high density foam with pressure point relief zones and antibacterial properties **COMFORT!**

**Coolmax Chamois:** This is an Italian quality, seamless chamois with antibacterial qualities. **RELIEF!**

**Micro Chamois:** This chamois is a small microfleece, breathable chamois that won't hold the water and is ideal for triathlon competitors. **DON'T STOP!**
